

The UTV Advantage

- Independent rear suspension which allows for off-camber terrain, tight trail navigation and large load hauling with maximum comfort
- V-Twin liquid cooled 800cc or new torque laden 500HO engine
- 3,500 lbs winch with remote capabilities
- Road worthy with LED lights, turning signals, and license plate holder
- Electronic power steering
- Dumping cargo box
- Options for plows and other attachments
- Canadian made CVTech transmission and clutches
- Full roll cage meeting CSA standards for ROPS (roll over protection)

Our utility task vehicle or UTVs are available for rent. They are built for plant or project site use, are road safe with headlights, brake lights, blinkers, full roll cages, speed governors and shoulder and lap seatbelts. These UTVs are the perfect solution for businesses seeking a quick runabout vehicle small enough to tread on undeveloped soft ground yet have enough carrying capacity and towing ability to deliver equipment and materials to almost any jobsite. The dump box offers convenience for heavy hauling jobs. UTVs are also fuel efficient with good fuel mileage. To keep operators and passengers comfortable in various weather conditions, a roof or windshield can be installed. The UTV's 4x4 wheel drive makes it a very capable vehicle in handling difficult terrain.

Contact us at 1-877-479-1388 or email sgruber@thomassolutions.ca for your truck or fleet rental and maintenance needs. We service all of Southern Ontario through our locations in Hamilton, Selkirk & Niagara as well as through our growing list of service partners.
